No 166.—In exercise of the powers conferred by sub-section (1) of section 12 of the Indian Press Act, 1910, the Governor in Council hereby declares to be forfeited to His Majesty all copies wherever found of a pamphlet in Urdu entitled "Sachchi Rahnumai (True Guidance)" by Maulana Mahomed Riyasat Ali Khan of Shah Jahanpur, United Provinces, and printed at the Hashim Press, Delhi, and all other documents containing copies or translations of or extracts from the said pamphlet, inasmuch as it contains matter which is likely or has a tendency to bring into hatred or contempt a class of His Majesty's subjects in British India and which therefore appears to be of the nature described in section 4 (1) (*a*) of the Act.

Fort St. George, June 6, 1921.

No. 167.—The following resolution of the Government of India is republished :—

HOME DEPARTMENT.

ESTABLISHMENTS.

Simla, the 16th May 1921.

No 1197.—In connection with the recommendation made by the Public Services Commission in the concluding sentence of paragraph 44 of Annexure X to their Report, the Government of India have had under consideration the question of pensions to be granted to Barristers, Vakils and Advocates of High Courts, and Pleaders of Chief Courts who, under the orders announced in paragraph 13 of the Home Department Resolution No 2650, dated the 1st December 1920, may be directly appointed to judicial posts ordinarily held by members of the Indian Civil Service. With the approval of the Secretary of State, they are now pleased to direct that the pensions of these officers shall be regulated under articles 466-A, 474, 474-A and 475-A of the Civil Service Regulations. In the case of superannuation pensions, officers with not less than ten years' actual qualifying service will also be allowed as a special case the concession of adding to their qualifying service the actual period not exceeding ten years by which their age at recruitment exceeds 25 years This concession will in almost every case enable officers recruited at the age of 26 years to earn a full pension, and those recruited at the age 40 to earn the 25 years' pension by the time they reach the ordinary age of superannuation, and the maximum pension if they are allowed to serve until they are 60 years of age. The ordinary rules which will apply to other forms of pension coupled with the special concession mentioned above for superannuation pensions will, the Government of India hope, be sufficiently attractive, especially as these officers will invariably be able to obtain, in the case of invalid and superannuation pensions, benefits from the additional pensions admissible under article 475 A. of the Civil Service Regulations.

The necessary additions and corrections to the Civil Service Regulations will be issued in due course.

N. E. MARJORIBANKS,

SECTION 41 (1).—FORM OF APPLICATION FOR RECOGNITION—vide Appendix 13 to these rules.
SECTION 41 (2).—RULES FOR RECOGNITION.

Recognition.

1. Each standard above the fourth standard shall be separately recognized. Recognition shall depend upon satisfactory evidence of the educational needs of the locality as well as of the other matters specified below.

Qualifications and Number of Teachers.

2 The teachers should either be of proved ability or should hold trained teachers' certificates. In elementary schools with standards above the fifth, the headmaster should ordinarily hold a secondary trained teachers' certificate. Untrained teachers below the age of 25 should be sent for training at the earliest opportunity.

3. The District Educational Council may refuse or withdraw recognition on account of the employment in a school of any teacher whom it, after due inquiry, considers unfit to be a teacher.

4 There shall be at least one regular teacher for every 40 pupils on the rolls. While this number of pupils is to be in all cases the maximum permissible, it is very desirable that there should be a teacher for every 30 pupils.

Protection from Smallpox.

5 The presence of pupils unprotected from smallpox may be regarded as a sufficient cause for withdrawal of recognition.

Building, Furniture and Appliances.

6. The building used for the school should be suitable, should be kept clean and should admit sufficient light and air.

7. The provision of much furniture need not be insisted upon, but there should be a supply of suitable pictures and other simple appliances.

Text-Books.

8. No books (other than books for religious instruction) shall be used in the school by the teacher or pupils which have not been approved by Government. A list of approved books for elementary schools will be published from time to time.

Register.

9. The following registers shall be kept in the prescribed form and produced to the inspecting officer or to a member of the District Educational Council when required:—

(1) A register of admissions and withdrawals (Appendix 14)
(2) A register of attendance of pupils (Appendix 15).
(3) A register of attendance of masters (Appendix 16).
(4) A register of progress and conduct (Appendix 17)
(5) An inspection book.
(6) A visitors' book (Appendix 18).

The registers must be carefully kept by the headmaster and should be countersigned by every inspecting officer who visits the school. No entry should be made in the inspection register except by an inspecting officer. The entries should be in a language understood by the master. In the visitors' book district officials and other visitors to the school may be invited to make remarks.

Admission and Promotion.

10 No transfer certificate shall be demanded from any pupil on admission to an elementary school. The pupil shall be placed in the class which the headmaster considers suitable. The inspecting officer may order the removal of any pupil from one class to another if it seems desirable; any such removal should be recorded in the progress and conduct register.

School-Leaving Certificate.

11. On leaving the school, having passed through the fifth or any higher standard, a pupil shall, on application, be granted a school-leaving certificate in the authorised form, if found by the inspecting officer entitled to it under instructions to be issued by the Director. These certificates are called elementary school-leaving certificates and must be on the numbered forms issued by the Director.

Medium of Instruction.

12 Instruction must be given through the medium of the vernacular of the pupils wherever this is possible. The exceptions would be cases of Muhammadans or pupils with a vernacular different from that of the bulk of the pupils.

Course of Study.

13. The course of studies should be arranged and the time-table drawn up in consultation with the inspecting officer. Schemes of studies from which selections should be made will be issued from time to time Due regard should be paid to local circumstances especially in rural schools where school hours and vacations should be suited to agricultural conditions. The inspecting officer should record his opinion in the inspection book as to which subjects each teacher is qualified to teach and no other subjects should be attempted by him. Special care should be taken in this respect in regard to English.

SECTION 42 (1).—FORM FORMS OF APPLICATION FOR AID—vide Appendices 19, 20 and 21

SECTION 42 (2).—RULES FOR AID.

Chapter I.—Teaching Grants on behalf of Elementary Schools.

1 *Scale of grants.*—Teaching grants will be calculated at the rate of Rs. 48 per year for each untrained teacher, Rs. 76 per year for each trained teacher of the lower elementary grade, Rs 92 per year for each trained teacher of the higher elementary grade, and Rs 168 per year for each trained teacher of the secondary grade. This amount will be called the assessed grant.

2 *Fixing the amount of grants.*—The inspecting officers may propose for a school a reduction not exceeding 25 per cent of its assessed grant for defects in organization, discipline, instruction and accommodation, also on account of a diminution of the number of school meetings, an undue shortening of the school day or the portion thereof devoted to secular instruction, the presence of pupils unprotected from smallpox, or insufficiency of funds. Intimation shall be given to the manager at the time of inspection of the inspecting officer's intention to recommend a reduction of the grant together with his reasons therefor. They may, on the other hand, propose for a school an increase not exceeding 50 per cent of its assessed grant, for the attainment of a high standard of efficiency, more especially for the introduction of any methods of teaching calculated to train the children's faculties and powers of expression and observation, proper attention to physical exercises, and generally any attempt to fit the children for their position in life.

The assessed grant as modified by the increase or decrease proposed by the inspecting officers shall be called the assigned grant. The grants so assigned shall be subject to the orders of the District Educational Council. Assignments of grants involving decreases of over 25 per cent or increases of over 50 per cent of the assessed grant shall be transmitted by the Inspector or Inspectress for the orders of the District Educational Council who may, on the report of the inspecting officer or after enquiry, determine the amount of increase or reduction of the grant or withhold it altogether and take such other measures as the occasion may appear to require in cases where there has been falsification of registers or misrepresentation regarding the employment of teachers or the attendance of pupils or any other fraud or irregularity, or violation of any of the conditions of recognition and aid

Increases of the assessed grant by more than 50 per cent shall be confined to special cases where it is obvious that sufficient funds from other sources are not forthcoming; in particular such increased grants may be made to higher elementary schools and schools for girls.

3. *Application for aid.*—Application for admission to aid in any year shall be made to the District Educational Council in the prescribed form so as to reach them not later than December 1st of the previous year.

4. *Admission to aid.*—The District Educational Council shall scrutinize the applications for aid and after considering the recommendations of the inspecting officers shall determine what schools shall be admitted to aid. In determining this they shall take into account, the number, the character and the financial condition of the schools, the educational needs of the locality and the funds available.

5. *Tabulation of schools admitted to aid.*—The District Educational Council shall draw up a consolidated list in the prescribed form (Appendix 1) of all recognized elementary schools indicating those admitted to aid.

A list of schools not admitted to aid shall also be prepared at the same time, the reason for rejection being briefly indicated in each case

Publication of lists.—A consolidated list of all recognised elementary schools indicating those admitted to aid shall be published in the prescribed form (Appendix 1) for each district, and shall be issued to the Presidents of Local Boards, treasury and inspecting officers and Deputy Inspectors of Vaccination.

6. *Annual inspection of schools.*—In addition to any other visit which may be paid by an inspecting officer to an aided school there shall be an annual inspection. The date fixed for the annual inspection shall be communicated to the management at least seven days beforehand and at the same time the management shall be furnished with a form (Appendix 22). This form shall be filled up by the management and submitted on the day of the inspection to the inspecting officer who shall compare it with the school registers and satisfy himself that the entries therein are correct. He shall forward it with a copy of his inspection reports to the District Educational Council through the Inspector or Inspectress.

7 *Payment of grants.*—The District Educational Council shall prepare a grant bill in the prescribed form (Appendix 23) for each school, or for each set of schools under the same management, in the same local area and having the same correspondent. The President of the Council, or the Vice-President if so authorized, shall sign such bills and shall send them to the correspondents before the close of February.

All grant bills should be signed by the correspondents concerned and should be presented for payment without delay and in any case before March 31st.

Chapter II.—Grants for School Buildings and for Hostels or Boarding Houses for Students.

1. *Objects of aid and sanctioning authority.*—Grants not exceeding Rs. 2,500 may be sanctioned by the District Educational Council for any of the following purposes:—

(1) Purchasing, erecting or enlarging school houses or buildings or students' hostels including residential quarters for the warden or other staff attached to the hostel

(2) Executing extensive alterations and repairs to buildings which have been newly purchased for school purposes

(3) Acquiring land for school or hostel purposes.

2 *Conditions of grant.*—(i) In the case of new buildings, extensions or alterations, the District Educational Council must have been convinced of their necessity and have approved their character In the absence of the special permission of the District Educational Council these must not have been commenced before the sanctioning of the grant.

In the case of purchases of land or buildings the District Educational Council must either have been consulted before the purchase was made or be convinced that land previously purchased is to be newly devoted to an educational purpose.

A space of at least 8 superficial feet and 80 cubic feet per head should be provided in every room used as a dining-room or for any other dwelling purposes other than sleeping.

3. *Building grant procedure.*—(i) Applications in the prescribed form shall be submitted through the Inspector or Inspectress to the District Educational Council accompanied by such outline plans as will enable the Council to judge of the suitability of the proposal from an educational point of view. The Council shall inform the correspondent whether it is prepared to consider the question of a grant, making, if necessary, alterations of the plans a condition of its so doing

(ii) In the case of applications for grants of Rs. 1,000 and more the following procedure shall be adopted If the Council's reply be favourable, the correspondent shall then submit to it, in duplicate, detailed plans, specifications and estimates (which may include architect's and engineer's fees) prepared by a recognized professional architect, a member or associate member of the Institute of Civil Engineers, a gazetted officer of the Public Works Department present or retired, or a present or retired District Board Engineer who will be responsible for the structural stability of the building. No building operations shall commence until after the issue of favourable orders on the suitability of the design and the reasonableness of the estimates The correspondent of the school in respect of which a grant is made will be required on completion of the work to furnish a certificate *signed by the architect or engineer in charge of the work* that a building generally in accordance with the plans and *specifications* which were submitted to the Council and on which the grant was sanctioned, has been completed and *another certificate signed by the correspondent himself* that the full amount of the grant has been duly expended thereon.

(iii) Where it is proved that private qualified professional advice is not available, and a grant-in-aid has been promised in respect of a building, the management shall, prior to the commencement of work thereon, give fifteen days' notice in writing to the Executive Engineer in charge of the division wherein it is proposed to construct the building During the progress of the work, access thereto and every reasonable opportunity to inspect and examine materials and take measurements shall be afforded by the management to the officers of the Public Works Department.

NOTE.—Any correspondent contemplating building operations, for which he desires a grant, should apply to the District Educational Council through the Inspector or Inspectress for (1) a form of application for grant and (2) instructions for the preparation of plans and estimates.

4. *Payment of grants.*—(i) Before the grant referred to in rule 3 (iii) is paid in full it shall be certified in the prescribed form (Appendix 25) by the Engineer or other responsible officer deputed to examine the building that the work has been completed in accordance with the approved plan and estimate, or that the building is worth the amount on which the grant is claimed. Such certificate shall be countersigned by the President or Vice-President if so authorized.

(ii) Before any grant is paid the owner (or, in cases in which the permission of the District Educational Council has been obtained, the management) of the property may be required to execute a mortgage of the property or a deed of acceptance in respect of the grant.

The Government Solicitor will be permitted to charge fees, not exceeding one per cent of the grant sanctioned, for the examination of titles and settlement of mortgages in connexion with building grants sanctioned for educational institutions.

(iii) Grants sanctioned for any of the purposes mentioned in rule 1 (1) and (2) except the purchase of buildings shall be drawn on bills prepared in the form printed as Appendix 26.

Grants sanctioned for the purchase of buildings or for the purpose mentioned in rule 1 (3) shall be drawn on bills prepared in the prescribed form printed as Appendix 27.

(iv) Advances may be made from time to time out of the sanctioned grant on the recommendation of the Inspector or Inspectress, provided that the District Educational Council is satisfied that the working is proceeding satisfactorily.

5. *Amount of grant.*—(i) The grant promised shall not exceed in the case of buildings to be erected one-half of the total cost of the work shown in the management's estimates as approved by the District Educational Council and modified by the Public Works Department and in the case of buildings or lands acquired one-half of the Collector's estimate of the value of the same.

(ii) The amount of grant to be actually disbursed shall be regulated by the actual cost of the work as finally completed. The grant promised with reference to the approved plans and estimates will be the maximum that will be paid, but the amount to be disbursed shall in no case exceed one-half of the actual cost of the work as finally executed. Before making payment the District Educational Council will require the management to furnish vouchers or certificates showing the actual amount expended by them in completing the work.

6 *Claims of the Council.*—If a building, for the acquisition, construction, extension, alteration or repair of which a grant has been drawn, or if land, for the acquisition of which a grant has been drawn, has, prior to the expiration of *forty* years from the date of payment of the grant, been diverted to purposes other than educational purposes approved by the District Educational Council, the manager shall refund such portion of the grant as may be determined by the Council If the manager fail to make such refund, the Council may recover the amount by such means as it may think fit.

(ii) Grants shall not be given to meet the cost of seats or desks of a pattern which has not been approved by the District Educational Council in consultation with the Inspector In special cases grants may be given for books and slates for the use of pupils, on condition that the books and slates remain the property of the school, are used by the pupils during school-hours only, and are not removed from the premises

(iv) Grants shall not be given for articles regarding which the District Educational Council has not been consulted and for which aid has not been promised previously to purchase or manufacture.

9 *Payment of grant.*—The grant shall be paid only on submission through the Inspector before the date specified in the order sanctioning the grant of vouchers duly receipted. It shall be drawn on a bill prepared in the prescribed form (Appendix 25).

10. *Claims of the Council.*—If an institution which has received aid under this chapter, is closed within five years from the date on which a grant under this chapter is drawn, the District Educational Council shall be at liberty to purchase the articles, towards the supply of which the grant was given, at a valuation to be made by an officer to be deputed by the Government for the purpose.

APPENDIX 24.

INSTRUCTIONS AS TO THE SANITARY AND HYGIENIC REQUIREMENTS TO BE OBSERVED IN THE DESIGNING AND CONSTRUCTION OF SCHOOL BUILDINGS IN THE PRESIDENCY OF MADRAS.

Selection of sites.

In the selection of a site the following points should be weighed against considerations of economy, convenience, proximity to houses of parents, etc.—

(1) A site should not be selected if its natural position is in a hollow or in the neighbourhood of high trees or houses which prevent the free circulation of air and the access of sunlight to the school buildings. Shady trees are, however, of value *in the play-ground* provided that they do not unduly reduce the space available for play and are not planted so close to the school buildings as to obstruct the entry of light into the class rooms, or in course of time, to cause damage to the structure.

(ii) Made soil should be avoided and, as far as possible, all soils which are specially retentive of moisture.

(iii) Sufficiency of space is important, and in this connexion the possibility of future extension and the necessity of giving subsequent-class rooms the proper orientation should be borne in mind

(iv) Channels and tanks in the vicinity are a disadvantage.

(v) The presence of rank vegetation, more especially prickly-pear, is objectionable.

(vi) The neighbourhood of dusty and noisy roads and of shops or factories should, as far as possible, be avoided.

2. All site plans should show the nature of the surroundings, the height of the neighbouring buildings, the north point and the direction of the prevailing wind.

Orientation of buildings.

3. This will differ for different parts of the Presidency and will depend chiefly on the best way to secure perflation of air. Subject to this the more buildings are lighted from the north the better.

Floor space

4. When funds are available, they should be utilized in providing floor space in excess of the following *minimum* requirement :—

For elementary schools ... ... 9½ square feet per pupil.

Rooms which are intended to be used for practical work, such as drawing rooms, workshops, etc., should be carefully designed with a view to the nature of the work and the number of students to be accommodated.

Composition of floors.

5. It is desirable that the floors should be made of a material which will admit of their being washed with water. Stone flagging or something better must be aimed at in rooms where desks or benches can be provided. Where the pupils have to sit on the floor, stone floors need not be insisted on if objected to. At the same time it must be recognized that from the hygienic point of view they are to be preferred and the objection on the score of their coldness can be met by providing boards or mats. But where this is done, the greatest care must be taken to ensure that the mats are kept scrupulously clean.

Seating arrangements.

6. The general principles which should govern the construction of desks are set forth in Annexure (i). Where dual desks are used, the desks may be arranged most suitably as shown in diagram, Annexure (ii).

7. Forms without backs and desks are objectionable ; type-designs for desks are issued by the department.

8. Pupils should be seated in rows with the main light falling from the left side; they should never face the light. The same remark applies to the teachers.

Windows.

9. Windows serve two purposes—

(*a*) Admission of light.

(*b*) Admission of air.

10. They should be placed at regular distances so as to ensure uniformity of light.

11. Window sills should not be more than 4 feet from the ground in rooms in which the scholars are seated at desks. When pupils sit on the floor the sills should come to within 2½' or 3' of the floor level. Windows for subsidiary lighting may have their sills more than 4' from the floor.

12. The window area should not be less than one-fifth of the floor area and wherever possible the principal lighting should be from the north.

Doors.

13. Class rooms should not have to be used as passages from one part of the building to another. They should consequently not open into one another but into passages or verandahs. No class room should have more than two doors and in most cases one is preferable. The door or doors should be at the teacher's end of the room.

Height of class rooms.

14 The minimum height of the room in elementary schools should be 10' to the tie beam when the room has an open sloping roof and 12' to the under side of the joists where the room has a terraced ceiling

Ventilation.

15. Unless there are windows reaching to the top of the wall and capable of being opened, ventilators are necessary near the top of the wall. The ventilators should be regularly distributed in the same way as the windows. For each pupil 48 square inches of open ventilator should be provided.

Dimensions and fittings of class rooms.

16. It is important that no school or class room should be more than 24' in width, or otherwise the rows of pupils will be too long to be properly controlled by the teacher. The length of

a room must depend on the number of classes to be held in it. In the case of a school divided into a number of class rooms, the dimensions of any room should not exceed 24'×25', that is, an approximate square. If it is admitted that a square is the best area for teaching purposes, the length of a class room in a one-roomed school should approximate closely to some multiple of the width. Ample wall blackboard space should be provided especially on the wall at the teacher's end of the room which should be unbroken by doors, windows or cupboards. Cupboard recesses in other walls should be provided, also recesses with open shelving. Rails under the cornice for hanging maps, pictures and diagrams are essential. The smallest class room for 40 boys in dual desks should be 21' wide and 23' long. The arrangement of such a room is shown in the diagram No. C.A. 306 of 1917, Annexure (ii). To accommodate similarly desks of larger dimensions those of the room must be proportionately increased.

Roofs

17. The roof should, as far as possible, be impervious to heat.

Sanitary arrangements.

18. Latrines should not be placed nearer than 40 ' to any school building. They should be so situated that the prevailing wind will not blow from them in the direction of the school.

19. The type-designs of the sanitary department should be consulted when planning latrines.

20. For boys' schools separate urinals and latrines should be provided. Separate accommodation should in all schools be provided for the teaching staff.

21. The number of latrine seats should be on the following scale :—

	Girls.	Boys.
Under 30 children	2	1
„ 50 „	3	2
„ 70 „	4	2
„ 100 „	5	3
„ 150 „	6	3
„ 200 „	8	4
„ 300 „	12	5
„ 500 „	20	8

22. There should be in addition for boys urinals at the rate of 4 per cent or if separate urinals are not provided the number of latrine seats should be correspondingly increased.

ANNEXURE (i).

1. The seat should not be so high as to prevent the child resting its feet upon the floor, or on a footboard, and if the latter, the knees should not be elevated.

2. Assuming a child to be sitting upright in his seat and the arms to be hanging freely down the edge of the desk next the body should be about an inch higher than the level of the elbows in the case of boys, and from 1½" to 1¾" in the case of girls.

(If the desk be higher than this, there is a tendency for the boy to be twisted and for one shoulder to be raised above the other with the consequent risk of lateral curvature of the spine.)

3. A line dropped from the edge of the desk ought to strike the edge of the seat or a point an inch or two within it.

(This arrangement obliges the child to assume an upright position which is best for the eyes and the spine.)

4. No seat should be without a back, and the top of this should be one inch lower than the edge of the desk in the case of boys, and one inch higher than the edge of the desk in the case of girls. (In schools which are graded, great inequalities will be found in the size of the scholars in each room, to meet which it is desirable to provide three sizes of desks. In schools of mixed ages there should be a large number of sizes.)

5. The desk must not be flat. It should slightly incline towards the child.

6. The seat should not be flat, but saddle-shaped. Change of position will be desirable.

7. The desks must be easy of access yet compactly arranged. The angle of vision for the teachers should be not more than 45°.

Height and dimensions.

(1) The sloping part of the top should be not less than 12" in width.
(2) The inclination should be about 2° and the slope should be about 1 in 10.
(3) The flat portion of the desk with groove should be from 3" to 3½" in width.
(4) The proper height allows the forearm of the seated child to rest horizontally upon the desk without discomfort—

(a) Youngest children ... ... 20" to 25" to the middle of the slope.
(b) Intermediate children ... ... 22" to 26" „ „
(c) Oldest scholars ... ... 30" to 36" „ „

The seat should be 16½" high.

(5) The back rail should be not more than 7" for younger children and not more than 10½ for the older ones.

(6) The minimum space for each child should be 20", 22" would be better.
(7) The width of the gangway should be 18" at least.
(8) The seats should be 8" wide.

NOTIFICATION.

Enquiries are reaching this office as to whether an examination in Arts will be held in October next. The question of holding the Arts examinations twice in the year has been referred by the Senate at its March meeting to a committee for consideration and report; and until the Senate Committee reports and until the Senate considers the report and comes to a decision on the matter, it will be impossible to make any statement regarding the holding of an October examination. As it is not expected that the Senate Committee will be able to finish its work before the middle of August next, it is not likely that the Senate will be able to arrive at a decision in time for the necessary arrangements for an October examination being made this year.

Preamble.

The following rules relating to the constitution and working of the Madras Law College have been sanctioned by the Government.

Object.

1. 11. The Principal shall devote his whole time to the work of the college, and shall be debarred from pursuing his profession except in consulting or chamber practice. This restriction shall not however apply to an officiating Principal. The professors and assistant professors shall be at liberty to practise.

The course of instruction for the special class shall be fixed by the Director on the recommendation of the Principal.

FILING OF PRINTED COPIES OF DOCUMENTS IN REGISTRATION OFFICES.

Documents admitted to registration under the Indian Registration Act, 1908, are ordinarily copied in extenso in bound register books, and with the object of minimising the delay that necessarily occurs in this process the Government have in the case of documents of an *ephemeral* character

approved of the system of registration by the filing of printed copies of documents. Registration Rule 114 reproduced in Annexure A.—Under this system a document presented to the registering officer for registration is accompanied by a copy of the printed form of the document. After the necessary formalities have been observed and the document has been admitted to registration the blank spaces in the copy are filled in by the registering staff, the copy thus made is compared with the original, the original is registered and returned to the party and the copy is filed in the registration office in a substantially bound file book with leaves numbered in print, this file book being regarded as an ordinary volume of register book and assigned a serial number in its series. As a precaution against the fraudulent substitution of sheets in the file the signature of the executant or his representative, assign or agent and if he be a marksman his thumb impression are taken on each sheet filed and the signature and seal of the registering officer are so affixed as to lie partly on the part in the file to which the form is pasted and partly on the pasted sheet. The file book intended for such copies is maintained in the personal custody of the registering officer until it is filled up when it is placed along with other completed volumes of register books which the establishment is not permitted to handle except in the immediate presence of the registering officer. As it is essential that the blanks in the copy should be filled in by the registering staff before the signature or thumb impression of the party is obtained thereon, registering officers are required to give preference to this work so that parties may not be detained in a registration office for a longer time than is absolutely necessary. No ink other than registration ink is used for filling blanks in and for writing on the copy.

2. The Inspector-General has sanctioned the application of this system to the undermentioned classes of documents :—

I. Documents of registered co-operative societies.

II. The undermentioned classes of documents to which the Government or a local body are a party :—

(a) Security bonds executed by shroffs, adhikaris, treasurers and their sureties.
(b) Prospecting licences.
(c) Security bonds executed by ministerial officers of civil courts.
(d) Leases of buildings to the Postal department.
(e) Leases and other documents executed by or in favour of local bodies relating to chatram lands, tolls, ferries and markets.
(f) Leases of land for salt manufacture.

III. The undermentioned classes of other documents :—

(a) Bonds for a period of less than twelve years.
(b) Chit mortgages.
(c) Debentures issued by associations and clubs.
(d) Leases exempted from stamp duty.
(e) Leases of property belonging to zamindaris, chatrams and devasthanams.
(f) Mortgages and leases in favour of nidhis and benefit funds.
(g) Promissory notes liable to a stamp duty of one anna.
(h) Sales and mortgages of crops or movables.
(i) Service agreements.

3. The conditions to be observed as regards the paper and the form to be used for documents to which the rule is applied are as under :—

(a) Either Lancashire Ledger paper of semi-foolscap size 13" × 8½" or other paper of that size of the kinds specified in Annexure B shall be used.

(b) The printing shall in the case of documents not extending beyond two pages be on one side only of the paper so that the first blank page may be available for the endorsements of the registering officer under sections 52, 58 and 60 of the Act. In the case of documents extending beyond two pages in print, it will suffice if the whole or a portion of the last page alone is left blank for the endorsements. Where the printed matter ends with a page bearing an even number a blank sheet of paper of the same quality as that upon which the document is printed shall be affixed to the document and to the printed form.

(c) Margins of 1½" at the top and ½" at foot in the case of odd pages of not less than 2" on the left and ½" on the right and in the case of even pages ½" on the left and 2" on the right shall be left on each page of the document so that no portion of the copy may be obliterated in pasting.

(d) Sufficient space shall be left in the body of the form for the names and addresses of parties and other varying items which have to be entered in manuscript so that the writing may not be cramped in the copy recorded in the registration office.

(e) The description of property being a variable item shall be in a schedule at the end of the document.

4. There is no difficulty in stamping printed documents as when the execution of a document is decided upon labels of the requisite value can be affixed and impressed by the proper officer on the payment of the duty under the rules under the Indian Stamp Act, 1899.

5. The system of registration by the filing of a copy of the printed form of a document has now been in force for over six years and has led to the saving of the time of the public and of time and labour in registration offices. It promotes the convenience of all concerned, whilst under the precautions adopted it is perfectly safe. The system is accordingly commended to the public for adoption wherever practicable.

ANNEXURE A

114. (i) With the previous sanction of the Inspector-General a special volume of Register Book 1 or of Book 4 in the form of a file book with numbered butts may be opened in any office for the registration of documents of an ephemeral character which are prepared on forms printed on such paper and in such forms as may be approved by the Inspector-General.

(ii) The copy of each document shall be made by the registering staff by filling in the blanks in a spare copy of the printed form and on this spare copy the endorsements and the certificate of registration entered on the original document shall be copied and the prescribed footnotes shall be added. The signature of the executant or his representative, assign or agent and if he is a marksman, his thumb impression shall be taken on each sheet.

(iii) The copy thus prepared shall be duly examined in the manner in which copies made by hand in the ordinary register books are required to be examined and shall be filed in the file book mentioned in clause (i). When a map or plan is attached to a document a copy of the map or plan shall be filed in the same file as the document.

(iv) After it has been so filed the registering officer shall authenticate the copy by his signature with date and shall also affix to it the seal of his office. He shall write his signature and affix the seal in such a manner that the signature and the impression of the seal shall appear partly upon the butt and partly on the sheet pasted thereto.

(v) When a copy consists of more than one sheet each sheet shall be pasted to a separate butt and the registering officer shall endorse on it the number of the sheet and the number of the document of which it forms part and shall affix his signature with date and the seal of his office to such endorsement in the manner laid down in clause (iv).

(vi) Documents registerable in Book 1 and Book 4 shall be filed in separate file books.

(vii) Each file book shall be assigned a serial number in the series assigned to ordinary volumes of register books.

(viii) Every document accepted for registration under clause (i) shall be numbered in the same series as documents copied in the ordinary register books.

(ix) When a document is registered under this rule a note of its registration in the file book shall be entered in the register book in which it would otherwise have been registered thus :

No. filed in file book volume

(x) The file books shall be kept in the personal custody of the registering officer until they are completely filled when they shall be placed among other completed volumes of register books.

The Government of India, in their notification No. 901-F, dated 21st March 1921 (published on page 406 of the *Fort St. George Gazette*, Part I, dated 12th April 1921), have permitted the use of adhesive stamps on the instruments known as 'Policies of Insurance' chargeable with stamp duty under article 47 of Schedule I of the Indian Stamp Act No. II of 1899. By section 64 of the Indian Stamp Act the duty of executing a duly stamped policy is laid upon Insurance Companies, and by sections 12 (1) and (3) of the Indian Stamp Act the person affixing any adhesive stamp must cancel the same so that it cannot be used again. The attention of the Insurance Companies in the Presidency is invited to the above provisions of the law and the instructions given, which it is requested, may be carefully observed.

NOTICE TO MARINERS.

INDIA-WEST COAST-NARAKAL.

Smooth water will be found in 2½ fathoms L.W.S.T. Soft sand on the following bearings magnetic, viz.—

Maliparam flagstaff	N. 80° E.
Narakal obelisk	N. 43° E.
Cochin light house	S. 46° E.

2. Mariners are cautioned that the sand flats off Narakal have extended sea ward.

3. Maliparam light, bright fixed, will be exhibited from the flagstaff from 15th May to 30th September.

4. In taking up an anchorage due consideration should be given to the state of the weather. The anchorage given is a good one for all weather, but smoother water will be found still further north. Vessels wishing for a quick despatch may, during fine weather, approach near Cochin to enable boats to get to and from Cochin between Vypeen point and the sands, but in this position during a fresh breeze a short sea soon gets up, making shipping operation difficult and causing damage to boats.

Not less than two tenderers will be selected and required to supply about 180 calves each a month.

Tenders will be opened precisely at 3 p.m. by the Director, King Institute, at his office at Guindy in the presence of those tenderers who may choose to attend.

Tenders should be superscribed "Tenders for the hiring of calves". Each tender must contain not only the rate of hire but also the total hire value of the supply.

Each tender must be accompanied by a deposit in currency notes only as earnest money of the amounts noted in the schedule. This deposit will be returned to unsuccessful tenderers immediately or one month after and to the successful tenderers as soon as they have satisfactorily executed their contract bond.

No person making a tender shall be allowed to withdraw it within thirty days from the date thereof and in the event of his so doing, his earnest money deposit shall be forfeited to Government.

The earnest money deposit of successful tenderers will be liable to forfeiture, if they fail to execute the bond binding them to supply, the cost of stamp being borne by the contractors executing it. They should also furnish security in cash or Government promissory notes to the extent mentioned in the schedule within one week from the date of the acceptance of the tender being made known to them.

The supplies should begin from 1st July 1921 and be made for one year from that date.

No advance of cash will be made to the contractors. Payment of hire in respect of the accepted calves will be made as soon, after their acceptance, as possible.

The contract must not be sublet.

The Director reserves to himself the right of rejecting any tender without assigning any reason for so doing.

In case the contractors after taking the contract be not willing to supply as per their agreement, they shall give at least one month's notice and shall forfeit the security to Government. In case of failure to supply calves on the dates required by the Director the contractors shall be fined an amount fixed by the Director which will be deducted from the security. The contractors will also be bound to make good to Government any loss which may arise from their withdrawal or failure. In the event of the Director having to purchase or hire out the calves specified in the contract locally at higher rates than those contracted for, the excess price shall be deducted from the other monies due to contractors or the amount of security, without the contract being cancelled by Government.

No calves shall be supplied to the Institute except on the authority of the Director or some responsible officer authorized by him in this behalf.

The calves hired out will be released after the vaccine operations thereon have been carried out and when no longer required. In the event of any casualty occurring among the accepted calves during their period of detention at the Institute, the Institute will indemnify the contractor at the rate of Rs. 2-2-0 a calf.

The respective contractors should remove the done calves within 24 hours after they are released. Calves not so removed will be disposed of by private sale or otherwise and the amount thus realized less departmental expenses incurred will be paid to the owners.
